FOR IMMEDIATE RELEASE

Integrated Care Management Announces 8th Consecutive Quarter of Revenue Growth

Revenue Up 11.4% over Q1 and 27% for 2009

ATLANTA— September 15, 2009— Integrated Care Management (ICM), a leading disability management firm, announces its 8th consecutive quarter of revenue growth.

The growth is a direct result of the company's decision to invest in the market, despite the economic downturn. In the second quarter, ICM added seven case managers and expanded its case management and integrated disability management services into Mississippi to meet client needs.

ICM EVP Kevin Hill attributes the growth to both the acquisition of new clients and the expanding requirements of current clients. "Our clients continue to require our services in new regions and we've made the commitment to provide case managers in those areas. They are pulling cases from other companies due to disappointing results and asking us to get them back on track. I firmly believe that our philosophy that workers who rehabilitate while on the job recover faster resonates with our clients. This is in stark contrast to most service providers that rehabilitate workers and then return them to work. "

ICM works with clients to determine the most appropriate and cost-effective way to treat injured or ill employees, keep them engaged with the company while they are out and return them to the job faster. It's also ICM's commitment to fast response that reduces case durations and safely gets injured workers back on the job more quickly. According to CM internal research, the average close date of a case that is referred within the first 48 hours post injury is 29 days versus 95 days for those cases addressed between 48 hours and two weeks following the injury.

Added Hill, "New referrals are up 14%, driven primarily by the quality of our case managers and their ability to work as a team. Their commitment to managing cases by dedicating the appropriate level of attention that each individual case requires versus focusing on billable hours benefits both the injured worker and the client's bottom line. By handling cases with the utmost care and professionalism, ICM case managers help the injured worker return to the job faster and reduce the impact on client productivity."

About Integrated Care Management

Integrated Care Management (ICM) is a leading disability management firm that services the needs of TPAs, Insurance Companies and Self-Insured firms. ICM offers case management services, including field case management, telephonic or on-site coordination to help clients determine the most appropriate and cost-effective way to treat injured or ill employees and return them to work. Integrated Disability Management Services enable employers to integrate Workers' Compensation, Short-Term Disability and Long-Term Disability into a single actionable and manageable program.
